Firm-wide reporting for multi-office law firms.

Jinka combines billing, matter, and time data from every office into one set of reports on profitability and utilization, updated automatically.

WHERE REPORTING FALLS SHORT

Separate systems per office

Each office has its own billing and reporting, often in a different currency (SGD, MYR, TWD, THB).

No targets for new offices

New offices and practices have no set targets for pipeline, ramp-up time, or profitability.

Unclear referral value

Referrals from network and partner firms bring in cross-border work. It is hard to see which ones generate fees.

HOW WE HELP

01 Firm Health Diagnostic

Profit and loss by office and practice.

- Matter profitability by practice and office
- Realization, collection, and utilization rates
- Written findings and a prioritized roadmap

02 Live Firm Dashboards

Reports for every office, updated automatically.

- Profitability, utilization, and growth by office and practice
- Consolidated across offices and currencies
- Pipeline, origination, and fee value by referral source

Security

- Client personal data stays in your own systems
- Read-only connections to your existing billing and practice management systems
- Our engineers follow secure SDLC practices and have worked to SOC 2 and OWASP standards

AI use

- AI use policy aligned with PDPA and professional duties
- A list of AI tools suited to each practice
- Client data never goes into third-party AI tools
- Built AI systems for regulated (HIPAA) healthcare clients

HOW IT WORKS

1 **Discover.** Short interviews and read-only access to billing and matter data.

2 **Analyze.** Consolidate offices and currencies into one model.

3 **Report.** Findings and recommended next steps, presented to partners.

4 **Monitor.** A dashboard that updates automatically, with secure AI integration.

FUNDING SUPPORT

Singapore law firms may be eligible for co-funding of technology projects under PSG-Legal or Enterprise Singapore's EDG. We can help you check eligibility before you start.

Eligibility to be confirmed with the relevant agency.

Book a 30 minute discovery call.

We are a software, data, and AI consultancy with staff in Taiwan, France, the US, and Canada. Our clients are in the US, EU, and APAC. We can meet in person.
